EXPERIENCE

Sky México - Frontend Developer (Jul/2022 - Oct/2024)

[Streaming and Video On Demand \(VOD\) Applications](#)

I was involved in the development of 2 streaming and Video On Demand applications, developing one of them from scratch. My duties ranged from component creation to resource optimization. Some of my main tasks here:

- Creating and managing components in React with Typescript, Material UI and CSS.
- Managing components in Angular with Angular Material and SASS
- Managing routes, calls to REST services with Axios, and the application states.
- Applying Atomic Programming and Responsive Design.
- Process automation with Python and Open CV.

Consultoría Educativa Especializada - Freelance (Mar/2024)

<https://jetrejo.github.io/CEE/>

I worked on this landing page as a freelance developer. It is a landing page for an educational consultancy, which was looking to show its course catalog and have a registration process.

- Created with HTML, CSS and Vanilla Javascript, applying Responsive Design.
- Use of external libraries to automate registration process.

Indra Sistemas México - Big Data Developer (Dec/2021 - May/2022)

[Client: BBVA México](#)

My main tasks were data ingestion and normalization, report creation and processing of the BBVA Data Lake.

Using technologies such as Git, Spark SQL, functional programming with Scala, Python notebooks and application of the SCRUM Framework

Personal Projects

[Some of my personal projects I would like to highlight](#)

Landing page to show my experience and technologies stack, made with React and Vite.

- Portfolio: <https://jetrejo.github.io/JETREJO>

Web page made as a practice using just HTML and CSS, applying Responsive Design.

- Lu-Lu Coffee Beans: (https://jt070.github.io/LandingPage_MaryCoffeeBrand/)

EDUCATION

Universidad Autónoma del Estado de México

[University Education](#)

- Branch of Accentuation: Software Development
